

ALL-STEEL AUTOMATIC SWITCH

DESCRIPTION

Automatic switches completely eliminate manual operation in gathering to a common head rail. Weight and forward motion of loaded trolley automatically throws switch, closing one rail and opening the other. When necessary to move a load in reverse direction, a manual pull reverses switch. Ideal where beef dressing rails merge onto a common head rail, or where cooler traffic moves onto outgoing head rail.

Code Number Chart: Shown looking from above. Applies to all switches listed

Update: A dimension on the 3-way R and 3-way L has changed: 13 1/4-in. = 14-in.

CODE

- + 1R, 1L, 2R, 2L
- + 3R, 3L, 3-way R*, 3-way L*

FINISHES

- + Painted
- + Electro-galvanized

TECHNICAL DATA

*Shipping Weight 29-lbs.
