

BRINE MIXING STATION

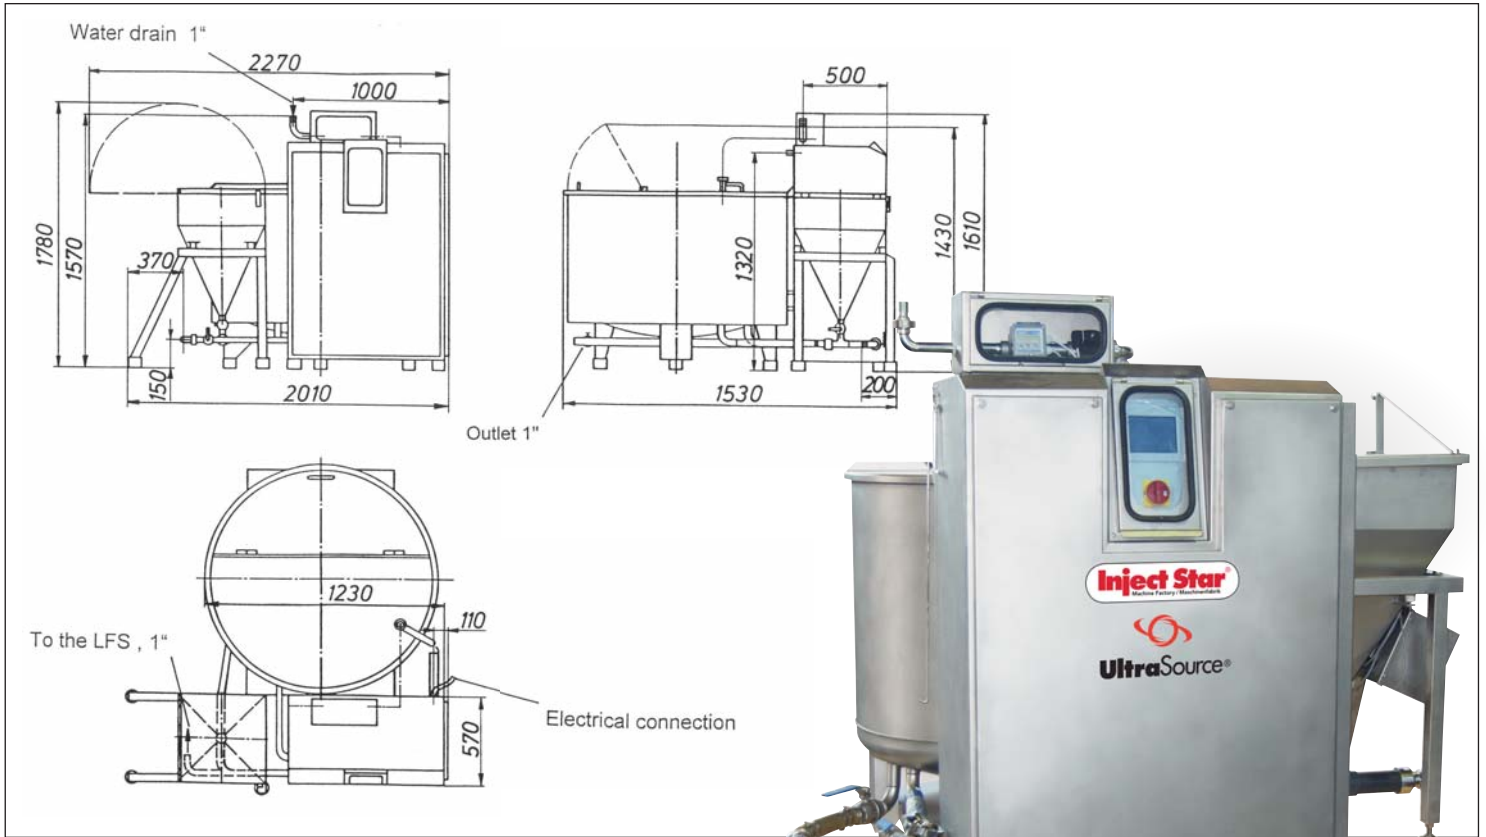

LB - 400

Featuring a robust design and ISC-B20 touch screen control, our LB-400 brine mixing station efficiently mixes up to 400 liters of brine. Operators simply add ingredients to the hopper, which are then pumped into the brine mixing tank via the machine's water line. The tank continues to fill with the necessary amount of water to create the ideal mixture. The final blend is continuously circulated throughout the tank.

BRINE MIXING STATION - LB-400

Features:

- Stainless steel construction
- 400-liter capacity
- ISC-B20 touch screen computer control stores up to 99 product programs
- Filling hopper for additives; features vibration motor and water dosing to speed mixing of ingredients
- Drain valve enables easy unloading or brine may be pumped to dedicated lines
- Glass gauge for fluid level measuring
